Cooking Containers

- The bake/broil pan included with the Convection Toaster Oven is suitable for items such as cookies, rolls, biscuits, nachos and pork chops.

- This toaster oven accommodates a variety of standard baking dishes, such as an 8-inch round or square cake pan, 6-cup muffin pan, 1 and 2 quart round, square, or rectangular casserole dishes. Choose bakeware made of either metal or glass/ceramic without lids.

- Dark or dull pans absorb heat faster; foods will bake more rapidly and crust will brown more easily than in shiny bake pans.
Check package directions on the container or contact the ovenware manufacturer to determine the container’s suitability for use in a Convection Toaster Oven.

NEVER use oven roasting bags in this Convection Toaster Oven, as they may come in contact with the heating elements.

**CAUTION:** Allow at least 1-inch air space between the top of the container and the upper heating elements. Never use glass lids on glass or metal bakeware. If a lid is necessary, cover tightly with heavy-duty aluminum foil.

**Before Using for the First Time**

**CAUTION:** To protect against electric shock, do not immerse the Convection Toaster Oven or allow cord to come into contact with water or other liquids.

1. Carefully unpack the Convection Toaster Oven and accessories removing all packaging materials. Remove any labels from the outer surfaces.

2. Use a clean damp cloth to wipe the inside and outside surfaces of the Oven. Wash all accessories in warm soapy water, rinse and dry thoroughly. Do not use abrasive cleaners.

3. To ensure that the Convection Toaster Oven is free from oils used in manufacturing, turn temperature control to MAX. Turn function control to CONVECTION BAKE. Set timer control to 15 minutes. At the end of the 15 minutes, the Convection Toaster Oven is ready for use.

**Operating Instructions**

**FUNCTION 1: TOAST**

1. Make sure the crumb tray is firmly in place in the bottom of the Convection Toaster Oven.

2. Plug into a 120V AC outlet.

3. Open the glass door and place the wire rack in the middle position. (See Figure 3.) Center up to 6 slices of bread or food on the wire rack. Close the glass door.

4. Turn temperature control to MAX.

9. When TOAST time is complete, a signal will sound, and the timer control will finish in the OFF position; the Convection Toaster Oven will shut off automatically; the power light will go off.

**NOTE:** If toasting is completed before the timer control shuts the Convection Toaster Oven OFF, turn the timer control to OFF. The power light will go off.

10. Open the glass door. Wearing protective oven mitts, pull the wire rack out from the Convection Toaster Oven. Be careful when removing toast from the back of the wire rack. The inside of the Convection Toaster Oven is very hot. Close the glass door.

11. Unplug unit when not in use. Allow to cool before cleaning.

**Hints for TOAST**

- Remove all protective wrappings from food before placing in Convection Toaster Oven. Follow toaster oven food directions.

- Use the BAGEL function for frozen and heavy breads.

- **CAUTION:** Use extra caution when toasting pastry items with runny-type frosting or open fillings.

- When toasting more than one slice of bread, use slices of similar size, thickness and freshness.
• One slice of bread requires a lighter setting than several slices of bread.

• Stale bread, thin bread or sweet bread products, such as tea cakes and fruit loaf, brown much more quickly than ordinary bread, so reduce toasting time.

• Different breads require different toasting times. Turn timer control to OFF and open the glass door to check toast color. Close glass door and reset timer control if more toasting time is needed.

• For best results, clean crumb tray frequently.

**FUNCTION 2: CONVECTION BAKE**

CONVECTION BAKE (or roast) circulates heated air throughout the oven cavity to maintain uniform temperature around the food.

**NOTE:** As foods will brown faster than when using conventional bake, recipe temperatures should be reduced by 25°F for best results.

1. Make sure the crumb tray is firmly in place in the bottom of the Convection Toaster Oven.
2. Place wire rack onto the lower or middle shelf rail.
3. Plug into a 120V AC electrical outlet.
4. Turn temperature control to the desired temperature setting.
5. Turn function control to CONVECTION BAKE.
6. Set timer control to desired baking time or STAY ON. The POWER light will illuminate. **NOTE:** The Convection Toaster Oven will shut OFF automatically if timer is set.
7. Preheat Convection Toaster Oven if necessary.
8. Carefully center baking dish directly on wire rack and close the glass door. You may place foods such as biscuits directly onto bake/broil pan.
9. To roast meats, turn the temperature control to 350° - 450°F (Roasting temperature).
10. If you are using the timer, when the CONVECTION BAKE time is complete, a signal will sound, and the timer control will finish in the OFF position; the Convection Toaster Oven will shut OFF automatically; the power light will go off.
11. If the timer control is set to STAY ON, or if the food is finished cooking before the timer has signaled, turn temperature control to MIN and the timer control to OFF. Make sure power light is off.

12. To keep food warm after it has been cooked, turn the temperature control to 150°F - 200°F and the function control to WARM. Set timer control to STAY ON or desired WARM time. The POWER light will illuminate.

**NOTE:** The Convection Toaster Oven will shut OFF automatically if timer is set.

13. Wearing protective oven mitts pull the wire rack out from the Convection Toaster Oven.

14. Unplug and allow to cool completely before cleaning.

**NOTE:** A meat thermometer should always be used to gauge internal temperature. The thermometer should be inserted into thickest portion of meat away from bones or fatty areas. Check progress 2/3 into the cooking process to ensure food does not overcook. (See Roasting Chart following.)

Hints for CONVECTION BAKE (Roast)

- A meat thermometer inserted into the center of the meat should always be used to ensure desired doneness.
- Roasting is recommended for large, tender cuts of meat and poultry.
- Seasoning prior to cooking adds to the flavor and the aroma during cooking.
- A layer of fat on the top of the roast promotes better browning and provides natural basting.
- When roasting meats with a high fat content, the bake/broil pan may fill with grease before cooking is completed. Carefully remove the bake/broil pan using oven mitts and empty. Replace for continued roasting.
- To roast vegetables, toss uniformly sized raw vegetables in olive oil or vegetable oil, add seasoned salt, and spread vegetables in a single layer onto the bake/broil pan, in the middle shelf rail. Roast at high heat, 425°F - 450°F for 15 to 20 minutes, turning halfway. Remove roasted vegetables when they are browned and cooked to your liking. Add seasoning when they are hot from the Convection Toaster Oven.

USDA Cooking Guidelines

NOTE: The United States Department of Agriculture recommends that meat and poultry be cooked to the following internal temperatures to be sure any harmful bacteria has been killed. Ground turkey and chicken should be cooked to an internal temperature of 165°F and ground beef, veal, lamb and pork be cooked to an internal temperature 160°F. Whole chicken and turkey should be cooked to an internal temperature of 180°F; 170°F for the breast. Goose and duck should be cooked to an internal temperature of 180°F. Fresh beef, veal and lamb, etc., should be cooked to an internal temperature of at least 145°F. Fresh pork should be cooked to an internal temperature of at least 160°F. When re-heating meat and poultry products, they should also be cooked to an internal temperature of 165°F.

10. To keep cooked pizza warm, turn the temperature control to 150°F - 200°F and the function control to WARM. Set timer control to STAY ON or desired WARM time. The POWER light will illuminate.
   **NOTE:** The Convection Toaster Oven will shut OFF automatically if timer is set.

11. Wearing protective oven mitts, pull the wire rack out from the Convection Toaster Oven. Remove cooked pizza carefully and transfer to a serving plate.

12. Turn temperature control to MIN. Make sure the timer control is in the OFF position and the power light is off.

13. Unplug and allow to cool completely before cleaning.
FUNCTION 3: BAGEL

Toast up to 3 sliced bagels or English muffins, or 6 sweet topped breads, thick sliced or artisan breads that require longer toasting times than an average slice of white bread. Place cut sides up to allow the upper heating elements to toast the tops to perfection.

1. Make sure the crumb tray is firmly in place in the bottom of the Convection Toaster Oven.
2. Plug into a 120V AC outlet.
3. Open the glass door and place the wire rack in the highest position. (See Figure 3.)
4. Center up to 6 halves or bread slices on the rack – cut or top side UP.
5. Close the glass door.
6. Turn temperature control to MAX.
7. Turn function control to BAGEL.
8. Set timer control to 10 minutes and then turn back to the level of brownness desired.
9. The POWER light will illuminate.

   **WARNING:** DO NOT LEAVE TOASTER OVEN UNATTENDED WHEN USING THE BAGEL FUNCTION.

   **NOTE:** The Convection Toaster Oven will shut OFF automatically.

   **CAUTION:** Do not set the timer control to the STAY ON position when using the BAGEL function.

   **CAUTION:** As soon as the timer control is engaged, the Convection Toaster Oven will turn ON; both heating elements will become hot immediately.

   **CAUTION:** Use care not to place anything on top of the Convection Toaster Oven.

   **CAUTION:** Do not touch the Convection Toaster Oven or any part of the Convection Toaster Oven without wearing oven mitts.

10. Watch bagels or toast through the glass door until desired color is achieved.

11. When BAGEL time is complete, a signal will sound, and the timer control will finish in the OFF position; the Convection Toaster Oven will shut off automatically; the power light will go off.
NOTE: If toasting of bagel is completed before the timer control shuts the Convection Toaster Oven OFF, you may shut the Convection Toaster Oven OFF manually by turning the timer control to OFF. The power light will go off.

12. Open the glass door. Wearing protective oven mitts, pull the wire rack out from the Convection Toaster Oven. Be careful when removing toasted bagels or foods from the back of the wire rack. The inside of the Convection Toaster Oven is very hot. Close glass door.

13. Unplug unit when not in use. Allow to cool before cleaning.

Hints for BAGEL

• The BAGEL function offers a darker browning to accommodate bagels and English muffins, thicker and denser slices of bread.

• Remove all protective wrappings from food before placing in Convection Toaster Oven. Follow toaster oven food directions.

• CAUTION: Use extra caution when toasting pastry items with runny-type frosting or open fillings.

• When toasting more than one piece of bagel, use slices of similar size, thickness and freshness.

• One bagel half requires a lighter setting than several bagel halves.

• Stale bagels, thin bagels or sweet bread products, such as tea cakes and fruit loaf, brown much more quickly than ordinary bread, so reduce toasting time.

• Different breadstuffs require different toasting times. Turn timer control to OFF and open the glass door to check toast color. Close glass door and reset timer control if more toasting time is needed.

• For best results, clean crumb tray frequently.
FUNCTION 4: CONVECTION BROIL

Convection broiling is perfect for thinner cuts of meats and fish. Circulated heated air provides a constant, gentle airflow that promotes browning and seals in juices when cooking meats and poultry.

1. Make sure the crumb tray is firmly in place in the bottom of the Convection Toaster Oven.
2. Open the glass door and place the wire rack in the highest position. (See Figure 3.)
3. Place the food onto the bake/broil pan and center onto the wire rack. Juices and fat will drip into the pan. Close the door.
4. Plug into a 120V AC outlet.
5. Turn function control to CONVECTION BROIL. Turn temperature control to MAX.
6. Set the timer control to STAY ON or the desired broiling time. The Convection Toaster Oven will shut OFF automatically if the timer is set.
7. Broil food until done, turning half way through cooking time. Wear protective oven mitts to pull the wire rack out from the Convection Toaster Oven. **WARNING: NEVER LEAVE TOASTER OVEN UNATTENDED DURING CONVECTION BROILING.**
8. When finished, turn the temperature control to MIN. Make sure the timer control is in the OFF position and the power light is off.
9. Unplug and allow to cool completely before cleaning.
10. Unplug when not in use.

**Hints for CONVECTION BROIL**

- Convection Broiling is used for thinner, tender cuts of meats.
- Marinated meats and fish should be dried before broiling.
- Broiling time is determined by the desired doneness and the distance between the food and the upper heating elements.
- NEVER place aluminum foil on top of the bake/broil pan. This traps grease and can cause a fire.
• Trim excess fat from meat and score edges to prevent curling.
• Thaw frozen meats and fish before broiling.
• ALWAYS pat meat dry to reduce smoke and promote brownness during broiling.

FUNCTION 5: WARM

1. To keep food warm after cooking, turn the temperature control to 150°F - 200°F and the function control to WARM.

2. Set timer control to STAY ON or desired WARM time. The POWER light will illuminate.

NOTE: The Convection Toaster Oven will shut OFF automatically if timer is set.

3. When finished, turn the temperature control to MIN. Make sure the timer control is in the OFF position and the power light is off.
